

SafeCHECK puts you on a data-driven path to help drive a consistent safety awareness program

Our SafeCHECK Survey Application (App) allows you to store important information about the fixed assets in your logistics hub all in one place. You can easily capture all the assets within your warehouse such as: loading dock and door positions, high speed doors, and high velocity fans.

Once assets are documented, you have a digital library to easily access and monitor your equipment to help optimize the product life cycle. You can also keep up-to-date on warranties and receive OSHA updates to keep you compliant.

With SafeCHECK, you can proactively and safely:

Raise safety & security standards for your company and your employees

Utilize data and electronic evidence to get real time conditions for your facility

Track warranty, OSHA requirements & proactive maintenance plans

Support budgeting efforts while reducing total cost of ownership

What you can expect with SafeCHECK:

STEP 1

- Free visual inspection
- Collect and analyze data

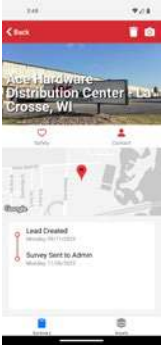

STEP 2

- Review results with a facility expert to maximize ROI & budget
- Develop and document a plan of action

STEP 3

- Monitor plan to ensure productivity & product life cycle optimization
- Receive OSHA updates & awareness data to address ongoing needs

How it **WORKS**

Capture Asset Information

The SafeCHECK Survey Application can easily create an inventory of the fixed assets in a facility.

Our facility experts start by downloading the app from either the IOS App store or the Google Play store to begin the process.

After that, the user selects the correct asset type and begins using the app to collect all relevant data for the item.

Entering Data

Once the asset is selected, the relevant fields are presented to the user.

Data entry is made easy by the app's use of drop-downs, sliders and text box controls.

Once the survey is completed, all data is consolidated into our 5-star rating system to give you a current safety assessment of your facility.

ID	Position	QR Code	Asset	Rating	Recommendations	Estimated Investment
01	Plant - Assembly - Area 1		Door	★★★★★		\$1000
02	Shipping - Station 02		Door - Latch	★★★★		\$1000
03	Shipping - Station 02		Door - Seal	★★★★★	Replace right rollers	\$1000
04	Shipping - Station 02		Door	★★★★★		\$1000

Additional Categories of Information That can be Captured:

- Photos & Video
- Warranty
- Maintenance
- Safety

Choose the right MinerCARE® Safety and Service Program that meets your facility maintenance needs!

SafeACT
