

CONTROL YOUR ENVIRONMENT TO CREATE A HEALTHIER OPERATION

When health is on the line, the airtight function of docks, doors and seals—where contaminants can gain entry—are crucial to stabilizing temperatures and ensuring cleanability. The pros at MINER® ensure your docks, doors and seals work to your high demands to support cGMP environments, protect product integrity and maintain strict separation between classified areas, all without slowing you down.

25% of all warehouse accidents occur at the loading dock.¹

Structural vulnerabilities

in openings, gaps and poor sealing can let in pathogens.¹

Air contamination can settle on product, processing lines, conveyors and packing surfaces.²

A 1-degree Celsius change can trigger denaturation or denaturation-induced aggregation, making a drug ineffective or causing severe adverse immune responses in patients.²

With MINER, you can:

Raise safety and security standards for your company and employees

Monitor your equipment to ensure its safety and defenses against pathogens

Reduce unplanned maintenance by as much as 50%

Reduce repair expenditures, lost productivity and product loss

HEALTHCARE, PHARMACEUTICAL AND BIOTECH FACILITIES

SAFETY, CONTAMINATION CONTROL AND TEMPERATURE STABILITY

We're here to keep your docks, doors and seals in optimum condition to keep out what you don't want. Whether you need it from us, need it installed or need it maintained and repaired, MINER is focused on maximizing the equipment you rely on most in your **healthcare-focused operation**.

Cleanroom High-Speed Doors ▶ Support rapid access while reducing particulate infiltration

Airtight Sliding/Swing Doors ▶ Maintain pressure differentials between classified spaces and corridors

Interlocks and Access Control ▶ Prevent simultaneous door openings to reduce cross-contamination risk

Corrosion-Resistant Wash-Down/Hygienic Doors ▶ Withstand aggressive cleaning and sanitation

Dock Seals/Shelters for Temperature-Controlled Shipping ▶ Support cold-chain and environmental control

SafeACT

Proactive Maintenance Plans

Create an ideal environment for loading docks, doors and more where safety comes first, leaving the best impression on your teams and customers.

SafeACT is MINER's comprehensive process that helps keep every aspect of your facility operating at peak effectiveness and efficiency.

Step 1:

Complete Maintenance Checklist

- Mechanical, electrical and safety inspection
- Inspect weather seals, dock bumpers and control boxes
- Adjust springs, spring tensions and limits, door balances and loading dock lips
- Dock pit cleaning and lubrication on all equipment
- And more

Step 2:

Review Results and Recommend a Solution

Our facility experts evaluate the findings and outline a clear plan of action to address immediate repairs and safety concerns. Plus, schedule recurring proactive maintenance visits to maximize ROI, reduce downtime and extend equipment life.

Step 3:

Perform Service and Repairs

Our expert technicians arrive in fully stocked MINER trucks, equipped with the parts needed to resolve 80% of issues on the first visit. This ensures efficient, high-quality service every time, backed by a 1-year warranty on parts and labor.

Proactive maintenance that keeps you ahead. Choose SafeACT for:
